

# Terrorism is Enemy of All Countries and Religions

written by Harakatuna

Responding to terrorism to death one grows a thousand is not normal for terrorist groups, because they see death on the battlefield with jihad in the name of religion is a great pride. Although the act of violence (terrorist) is actually very disturbing the security of the global community.

This security crisis certainly becomes a great opportunity for potential acts of terrorism to be more massive in various parts of the country, especially in countries where the majority of Islam should always be regarded as the last drop of blood to fight for jihad in the name of religion in establishing an Islamic state.

The international world indeed condemns and condemns acts of extraordinary crimes (terrorism) that destroy humans. Although many countries sympathize and support measures to eradicate terrorism, there are still many terrorist groups spread everywhere and carry out attacks.

Acts of terrorism that are robbed by religion are claimed as fundamentalist extremist groups that often justify terror and mass killings of people and prevent violence. Ironically, terrorism has now been transformed into a frightening ghost, because terrorism is haunting everywhere.

The crime of terrorism in Indonesia is classified as organized crime or organized crime, committed by a group of people with

specific aims and objectives. The form of terrorism crime is a cross-border ration that does not end its violence without unexpected and many victims.

On the other hand, the impact of increased terrorism is because after the death of the leadership of radical groups that gave birth to acts of terrorism. Among them, Osamah Bin Laden, Abu Bakar al-Baghdadi, both of them are indeed phenomenal terrorists who lead jihadists in the name of Islam as the nadir of the struggle.

In addition, the emergence of religious terrorism in its modus operandi is due to the increasing number of religious radicalism groups whose aim is to establish a state whose systems are all based on the Islamic label. Be it, ISIS, Jama'ah al-Qaeda, Taliba, and other terrorist groups scattered in the middle east.

### **Terrorism Action Parameters**

Several acts of terrorism that occurred in various parts of the country, especially in Indonesia, were classified as violence due to economic, political, legal and cultural injustices. One factor is the country's economic policy that does not reflect justice greatly affects the fertility of acts of terrorism.

Therefore, we need to look at the parameters of terrorism by examining the extent to which violence is massive or not? According to the 2019 Global Terrorism Index released by the Institute for Economics and Peace (IEP), it shows that the mortality rate caused by terrorist attacks has declined globally. However, the number of countries that still experience terror is dominantly increasing.

While reported by Media Indonesia (03/05/19), the Global Terrorism Index in 2018, Mesuring the Impact of Terrorism, in the 2013-2017 period, there were 127 attacks by individuals / groups whose ideology of white supremacy / ultrakanans that took its toll 66 souls. From the data, it is indicated that ultrasound terror shows an increasing trend, both in the number of attacks and casualties.

Although there is a decrease in the number of deaths due to terrorist attacks, this certainly does not make all the roles of the state stop eradicating the understanding of radicalism which often gives birth to terrorism. Therefore, it is very dangerous for the sovereignty of the country and threatens the integrity of the people in this nation.

## **Role Solidity**

Because the crime of terrorism is not a new term that occurs and once in action can kill hundreds of people. We need to be aware of this violence, especially by the community and law enforcement officials, as well as interfaith leaders to look for potential loopholes in violent actions that arise from radical groups.

Its preventive role, the State Intelligence Agency has a great responsibility to safeguard the sovereignty of the state from terrorism attacks so that it does not easily trigger the destruction and damage to the joints of the life of the nation and state. Because terrorism is our common enemy that must be fought and fought with with our consciousness.

In addition, the educational role is from the National Counterterrorism Agency which has a de-radicalization program to continue actively building former terrorist inmates to be able to become a doorway for people before entering the terrorist group. And strengthened by national and religious insights as a solution to close the space for potential violence.

Acts of terrorism whose motives are religious doctrine and state economic policy must be made important lessons by the state. In this case, the government should conduct a review and arrange the institutions that are authorized to eradicate terrorism, and improve future strategies so that they can run more effectively.[Khalilullah]
